Note: Name, location and the number of healthcare lawyers are self-reported from firms responding to Modern Healthcare's survey; only firms that participated were considered for this ranking. The survey ranking methodology is based on a blended score: Sum of 50% weight from data collected in the survey (number of healthcare lawyers in 2013) and 50% weight of American Health Lawyers Association membership from each firm, provided by the AHLA as of June 5, 2014. In the event of a tie, firms are listed alphabetically. Visit modernhealthcare.com/data for the complete ranking.
